10.	_____	_____

**Retail Names – to be used in answer column 1 Intermediates**

Beef Retail Meat Cuts

1. Beef for stew	17. Sirloin steak, shell	32. Bottom round roast
2. Brisket, point half	18. Sirloin steak, boneless	33. Bottom round steak
3. Brisket, whole	19. Tenderloin steak	34. Eye round roast
4. Arm roast	20. Porterhouse steak	35. Eye round steak
5. Arm roast, boneless	21. T-bone steak	36. Heel of round roast
6. Arm steak	22. Top loin steak	37. Rump roast, boneless
7. Arm steak, boneless	23. Top loin steak, boneless	38. Round steak
8. Blade roast	24. Short ribs	39. Round Steak, boneless
9. Blade steak	25. Skirt steak	40. Tip roast
10. 7-bone roast	26. Rib roast, large end	41. Tip roast, cap off
11. 7-bone steak	27. Rib roast, small end	42. Tip steak
12. Flank steak	28. Rib steak, small end	43. Tip steak, cap off
13. Sirloin steak, flat bone	29. Rib steak, small end, boneless	44. Top round roast
14. Sirloin steak, pin bone	30. Ribeye roast	45. Top round steak
15. Sirloin steak, round bone	31. Ribeye steak	46. Cross cuts
16. Sirloin steak, wedge bone		47. Cross cuts, boneless

Lamb Retail Meat Cuts

48. Breast	54. Sirloin chop	60. Rib roast
49. Breast riblets	55. Leg sirloin half	61. Rib roast, boneless
50. American style roast	56. Loin chop	62. Shanks
51. Leg Center slice	57. Loin double chop	63. Blade chop
52. French style roast	58. Loin roast	64. Neck slice
53. Leg shank half	59. Rib chop	65. Shoulder square cut

Pork Retail Meat Cuts

66. Fresh ham center slice	73. Center rib roast	80. Arm roast
67. Fresh ham rump portion	74. Center loin roast	81. Arm steak
68. Fresh ham shank portion	75. Loin chop	82. Blade Boston roast
69. Fresh side pork	76. Rib chop	83. Sliced bacon
70. Blade chop	77. Sirloin chop	84. Smoked jowl
71. Blade roast	78. Top loin chop	85. Smoked Canadian Style Bacon
72. Butterfly chop	79. Arm picnic roast	

**Species of Cut – to be used in answer column 2 by Intermediates**

30.	Nose ring pliers	
31.	Obstetrical (O.B.) chain	
32.	Plastic Sleeve	
33.	Ralgro pellet injector	
34.	Ram marking harness	
35.	Rumen magnate	
36.	Scotch Comb	
37.	Slap tattoo	
38.	SYNOVEX Implant cartridge	
39.	SYNOVEX Implant gun	
40.	T-Post Electric Fence Insulator	
41.	Water Heater	
42.	Wood post electric fence insulator	

### Equipment Uses – to be used in answer column 2 by **Intermediates**

- |  |  |
|--|--|
| <p>A. A non-rusting, electric fence insulator that fits snugly around the web and flange of T-posts.</p> <p>B. A device placed on rams that shows when a ewe has been serviced.</p> <p>C. Used to chop meat for sausages.</p> <p>D. Used to cut up meat carcasses.</p> <p>E. An instrument used for the bloodless castration (young male calves, lambs, and goats) and docking of tails (young lambs and goats). It is used to place a small rubber ring over the scrotum or tail to shut off circulation.</p> <p>F. Used to shear and groom the wool from sheep. Blade lengths typically range from 3 to 6-½ inches.</p> <p>G. An instrument used to control vaginal prolapse in ewes.</p> <p>H. Used to prevent hogs raised outdoors from rooting holes in the ground.</p> <p>I. Used for temporary identification of livestock.</p> | <p>J. An automatic waterer used to provide clean, fresh water to pigs.</p> <p>K. Used to keep water tanks from freezing.</p> <p>L. An instrument used for the bloodless castration of young male calves, lambs, and goats by severing (crushing) the testicular cord.</p> <p>M. Used to clip off the 4 pairs of very sharp teeth found in baby pigs.</p> <p>N. Used to comb (groom) the hair on cattle.</p> <p>O. Used to dock the tails of lambs and piglets. It cauterizes as it cuts the tail to eliminate excessive bleeding.</p> <p>P. Used to administer precise amounts of liquid medications to cattle, goats, sheep and horses.</p> |

## Intermediate Individual Quality Assurance – 2018

You are the manager of a beef cattle feedlot. Use the **Rumensin™ 90** label to answer the **10 questions** below relating to cattle and goats. **Circle the best answer.** (10 questions worth 5 points per question for 50 total points).

**1. Rumensin™ 90 is labeled to improve which of the following?**

- A.) Feed Efficiency in Slaughter Cattle
- B.) Milk Fat % in Dairy
- C.) Average Daily Gain in Swine
- D.) Equine Stamina

**2. Rumensin™ 90 is manufactured by \_\_\_\_\_?**

- A.) Elanco Animal Health
- B.) Bluegrass Vet Supply
- C.) Oklahoma Feed and Vet Supply
- D.) Wildcat Animal Health LLC

**3. When feeding Rumensin™ 90, which of the following is NOT true?**

- A.) Prevents Coccidiosis in Goats
- B.) Improves Feed Efficiency in Slaughter Cattle
- C.) Increased conception rate in Dairy Cows
- D.) For increased weight gain in stocker cattle

**4. What is the correct dosage of Rumensin™ 90 to prevent coccidiosis for a mature 1400 beef cow that has been on pasture for at least ten days?**

- A.) 588 mg
- B.) 196 mg
- C.) 350 mg
- D.) 14 mg

[OVER]

5. Feeding Rumensin™ 90 undiluted or at too high concentration level could cause?

- A.) Improved speed in Race Horses
- B.) Improved Feed Efficiency
- C.) Mastitis in meat goat does
- D.) Death in cattle and goats

6. What is an appropriate temperature to store Rumensin™ 90?

- A.) 99 C
- B.) 25 C
- C.) 85 F
- D.) 90 F

7. Which statement is true about Rumensin™ 90?

- A.) The liquid supplement pH is 10.2
- B.) Should be injected subcutaneously
- C.) Do not self-feed to feeder cattle or replacement heifers on pasture during the first 5 days
- D.) Feed at a rate of 17 pounds per ton to goats

8. When mixing and handling Rumensin™ 90 which should you use?

- A.) Dust Mask
- B.) Impervious Gloves
- C.) Protective Clothing
- D.) All of these

9. Before using Rumensin™ 90 it should be \_\_\_\_\_.

- A. Inhaled for quality of product
- B. Mixed properly
- C. Heated to boiling point
- D. Taken off the truck dashboard in the middle of summer

10. The use of Rumensin™ 90 is not approved for use in veal.

TRUE

FALSE

## Intermediate Quiz – 2018

**Carefully circle the correct answer to each of the questions below.** (Each question is worth 2 points each for a total of 50 points)

- 1.) What is an animal called that has two or more breeds in its ancestry?
  - a. Crossbred
  - b. Purebred
  - c. Toxoplasmosis
  - d. Goiter
- 2.) Name three commonly used grains in sheep rations.
  - a. Copper, Whole Soybeans, Oats
  - b. Oats, Corn, Barley
  - c. Alfalfa, Clover, Fescue
  - d. B12, Oats, Alfalfa
- 3.) What can cause prolapse in sheep?
  - a. Overweight, Coughing, Short Dock
  - b. Too high Grain Ration, Genetics
  - c. Vitamins and Water Only
  - d. Both A and B
- 4.) What are the main two feed ingredients in a swine ration?
  - a. Corn and Soybean Meal
  - b. Lysine and Corn
  - c. Ivomec and Barley
  - d. Ground Limestone and Soybean Meal
- 5.) Corn is high in \_\_\_\_\_?
  - a. Minerals
  - b. Protein
  - c. Energy
  - d. All Vitamins
- 6.) What is the money **made** on a hog after the purchase price and cost of raising is subtracted from selling price?
  - a. Initial Cost
  - b. Invoice
  - c. Profit
  - d. Loss
- 7.) What are two mineral sources often included in protein supplements for swine?
  - a. Limestone and Dicalcium phosphate
  - b. Bone Meal and B12
  - c. Lysine and Aureomycin
  - d. All of the above
- 8.) What is it when crossbred offspring perform above the average of their purebred parent's breeds?
  - a. Heterosis
  - b. Hybrid Vigor
  - c. Tincture
  - d. Both A and B

- 9.) Approximately what percent protein is Corn?
- a. 2.5-3
  - b. 22-23
  - c. 8.5
  - d. 16
- 10.) What is a baby pig born dead called?
- a. Weanling
  - b. Active
  - c. Barrow
  - d. Stillborn
- 11.) Corn silage, Pasture and Hay are examples of what types of feed?
- a. Roughages
  - b. Energy
  - c. Vitamins
  - d. Legumes
- 12.) A feed bunk for a group of market beef animals should be how far from the ground or floor?
- a. 5 inches
  - b. 60 inches
  - c. 54 – 58 inches
  - d. 24 – 30 inches
- 13.) What is the name for a short presentation in a Judging Contest where you discuss the livestock?
- a. Terminology
  - b. Note Cards
  - c. Oral Reasons
  - d. Bring a Prepared Speech
- 14.) How many linear feet of bunk space does a market beef animal require?
- a. 1 foot
  - b. 2 ½ - 3 feet
  - c. 5 feet
  - d. 10 – 12 feet
- 15.) What is a beef animal that naturally lacks horns called?
- a. Polled
  - b. Scurred
  - c. Horned
  - d. Steer
- 16.) What is the most important thing to provide livestock?
- a. Hay
  - b. Water
  - c. Salt
  - d. Vitamins
- 17.) Two seasons of the year when most purebred calves are born?
- a. Spring and Fall
  - b. Spring and Winter
  - c. Summer and Fall
  - d. Fall and Winter
- 18.) What is the main reason to groom an animal at home and at a show?
- a. Improve its appearance
  - b. Improve its ability to eat less feed
  - c. Make its body temperature increase
  - d. Keep it from growing horns

- 19.) What comes from the loin of a beef animal?
- a. Round
  - b. Porterhouse Steak
  - c. Brisket
  - d. Ham
- 20.) What are major issues that affect sheep?
- a. Parasites and Pneumonia
  - b. Pregnancy Disease and Vibrio
  - c. Enterotoxemia and Sore Mouth
  - d. All of these
- 21.) Which two of these are grades in slaughter cattle?
- a. Quality and Yield
  - b. Muscle and Bone Density
  - c. PSE and Percent Lean
  - d. Protein and Vitamins
- 22.) What is the carcass from an old sheep called?
- a. Rack of Lamb
  - b. Easter Lamb
  - c. Mutton
  - d. Leg of Lamb
- 23.) Lambs born in this month would be the least costly to raise?
- a. December
  - b. January
  - c. February
  - d. April
- 24.) What is the inflammation, becoming infected and hardening of the udder called?
- a. Constipation
  - b. Lactation
  - c. Productivity
  - d. Mastitis
- 25.) When does pregnancy disease occur?
- a. Last 40 days of gestation
  - b. Last 40 days of lactation
  - c. Last 40 days of breeding season
  - d. Last 40 days before breeding season

## Questions

- 1.) Which hay sample has the most Red Clover?   2
- 2.) Which hay sample has good color and looks the most palatable?   1
- 3.) Which hay sample is Alfalfa?   3
- 4.) Which hay sample would ruminants clean up and leave the least waste?   1
- 5.) Which hay sample looks the most like straw or bedding?   4

## Leftovers and Food Safety

Often when we cook at home or eat in a restaurant, we have leftovers. To ensure that leftovers are safe to eat, make sure the food is cooked to a safe temperature and refrigerate the leftovers promptly. Not cooking food to a safe temperature and leaving food out at an unsafe temperature are the two main causes of foodborne illness. Safe handling of leftovers is very important to reducing foodborne illness. Follow the [USDA Food Safety and Inspection Service's](#) recommendations for handling leftovers safely.

### Cook Food Safely at Home

The first step in having safe leftovers is cooking the food safely. Use a food thermometer to make sure that the food is cooked to a safe, minimum internal temperature.

- **Red meats:** Cook all raw beef, pork, lamb and veal steaks, chops, and roasts to a minimum internal temperature of 145° F as measured with a food thermometer before removing meat from the heat source. For safety and quality, allow meat to rest for at least three minutes before carving or consuming. For reasons of personal preference, consumers may choose to cook meat to higher temperatures.
- **Ground meats:** Cook all raw ground beef, pork, lamb, and veal to an internal temperature of 160° F as measured with a food thermometer.
- **Poultry:** Cook all poultry to an internal temperature of 165° F as measured with a food thermometer.

### Keep Food out of the "Danger Zone"

Bacteria grow rapidly between the temperatures of 40° F and 140° F. After food is safely cooked, hot food must be kept hot at 140° F or warmer to prevent bacterial growth. Discard any cold leftovers that have been left out for more than 2 hours at room temperature (1 hour when the temperature is above 90 °F).

### Cool Food Rapidly

To prevent bacterial growth, it's important to cool food rapidly so it reaches as fast as possible the safe refrigerator-storage temperature of 40° F or below. To do this, divide large amounts of food into shallow containers. A big pot of soup, for example, will take a long time to cool, inviting bacteria to multiply and increasing the danger of foodborne illness. Instead, divide the pot of soup into smaller containers so it will cool quickly.

Cut large items of food into smaller portions to cool. For whole roasts or hams, slice or cut them into smaller parts. Cut turkey into smaller pieces and refrigerate. Slice breast meat; legs and wings may be left whole.

### Wrap Leftovers Well

Cover leftovers, wrap them in airtight packaging, or seal them in storage containers. These practices help keep bacteria out, retain moisture, and prevent leftovers from picking up odors from other food in the refrigerator.

### Store Leftovers Safely

Leftovers can be kept in the refrigerator for 3 to 4 days or frozen for 3 to 4 months. Although safe indefinitely, frozen leftovers can lose moisture and flavor when stored for longer times in the freezer.

### Thaw Frozen Leftovers Safely

Safe ways to thaw leftovers include the refrigerator, cold water and the microwave oven. Refrigerator thawing takes the longest but the leftovers stay safe the entire time. After thawing, the food should be used within 3 to 4 days or can be refrozen.

Microwave thawing is the fastest method. When thawing leftovers in a microwave, continue to heat it until it reaches 165° F as measured with a food thermometer. Foods thawed in the microwave can be refrozen after heating it to this safe temperature.

### Reheat Leftovers Safely

When reheating leftovers, be sure they reach 165° F as measured with a food thermometer. Reheat sauces, soups and gravies by bringing them to a rolling boil. Cover leftovers to reheat. This retains moisture and ensures that food will heat all the way through.

## Intermediate Team Quality Assurance Exercise – 2018

In today's Food Industry, it is becoming more and more important that we have trained, qualified individuals to provide research based information that is guided by common sense about the food we raise, provide and sell to the general population. Your mission at the Quality Assurance Station is work together as a team to answer the following questions which deal with food safety and animal / human contact dealing with influenza. Take your time but work efficiently. This is a double station so you have **24 minutes** to work through this activity and **you do not defend to a listener** at this station. (There are 25 questions with each correct answer being worth 4 points each for a total of 100 points).

**Questions 1 – 4 are over animal / human contact dealing with influenza.**  
**Please circle your answer.**

1. You can always tell when an animal is sick because:
  - a. They will always appear ill.
  - b. They will always have a fever.
  - c. An animal can appear healthy and normal, but actually be ill and able to transmit disease.
2. When is it ok to allow Fair visitors to enter your pens to pet your animals?
  - a. When their parents are with them.
  - b. If they promise to wash their hands, afterwards.
  - c. If they ask nicely.
  - d. They shouldn't enter your pens.
3. Influenza is caused by a:
  - a. Virus
  - b. Bacteria
  - c. Prion
  - d. Prius
4. It is important to wash your hands with soap and water when:
  - a. Right before you eat
  - b. After you handle animals
  - c. Only when they are dirty
  - d. Both A and B

Questions 5-9 deal with cooking temperatures.

They are worth 4 points each.

Match the terms to the temperatures.

Temperature Is Important To Keep Food Safe

5.) 160° - 212° \_\_\_\_\_

6.) 140° - 160° \_\_\_\_\_

7.) 40° - 140° \_\_\_\_\_

8.) 32° - 40° \_\_\_\_\_

9.) -20° - 0° \_\_\_\_\_

Match these terms next to temperatures above:

- A. Refrigerator temperature-will not kill bacteria
- B. Hot enough to prevent most harmful bacteria from growing
- C. Temperature Danger Zone
- D. Freezer temperature-will not kill bacteria
- E. Hot enough to kill most harmful bacteria

**Questions 10 – 14 are over how quickly Bacteria can multiply.**  
**They are worth 4 points each.**

It was 12 o'clock noon **on a hot summer** day when Jody's father took her to the local sub sandwich shop for lunch. Jody was only able to finish half of her turkey, cheese, tomato and lettuce sandwich while at the shop. She took the rest of it with her to eat later. On the way home she was thinking about all the chores that she had to finish before she could go to the movies that evening. In a rush, she left the sandwich in her father's car and ran into the house. It was 1:30 by the time Jody entered the house.

At 3:00 p.m., Jody finished her chores. Jody was getting hungry. She remembered that her sandwich was still in the car. She ran out to the car and brought the sandwich inside. The sandwich was a little warm and the lettuce was a little wilted, but otherwise the sandwich looked fine. Jody quickly ate the sandwich so she could get ready to meet her friends.

If there were 5 bacteria in the sandwich when it was made, and if the bacteria doubled in numbers every 20 minutes, then...? Complete the following chart: **Each correct answer is worth 4 points each.**

Time of Day	Number of Bacteria
12:00 noon	5
12:20 p.m.	10
12:40 p.m.	20
1:00 p.m.	40
1:20 p.m.	80
1:40 p.m.	<b>Q. 10)</b>
2:00 p.m.	<b>Q. 11)</b>
2:20 p.m.	<b>Q. 12)</b>
2:40 p.m.	<b>Q. 13)</b>
3:00 p.m.	<b>Q. 14)</b>

**Questions 15 – 25 are random Food Safety questions.**  
**They are each worth 4 points each.**

15. If you are preparing sandwiches for your family, which one of the following should you do first?
- a. Wash and cut the lettuce      b. Wash your hands      c. Lower the periscope on the sub
16. Recommended hand washing takes how long?
- a. 5 seconds      b. 20 seconds      c. 5 minutes      d. 20 minutes
17. Why do fruits and vegetables need to be washed before you eat them?
- a. To remove wax      b. To wash away germs      c. To make them taste better
18. What should you do with food you think is unsafe?
- a. Taste to see if it is ok      b. Throw it away      c. Stick back in the refrigerator
19. A hamburger should be what color to be safe?
- a. Bright red in the middle      b. Brown in the middle      c. Yellow in the middle
20. Which one will **not** cause a food borne illness?
- a. An ill person preparing food      b. Contaminated food      c. Pancake syrup
21. Which one would **not** cause a germ to get in your food?
- a. Drinking after someone      b. Cutting meat on a clean cutting board      c. Eating food off the floor
22. Handwashing is **not** important:
- a. After touching raw chicken      b. After blowing your nose      c. After falling asleep
23. What could you use in your school lunch bag to keep food cold?
- a. Ice Cubes in a zip lock bag      b. Cold Pack      c. Thermos      d. All of these
24. Which sandwich would be safe in a lunch bag without being kept cold on a hot day?
- a. Peanut butter and jelly      b. Ham and cheese      c. Egg salad
25. Which one is a risky food:
- a. Cooked rice      b. Appropriately cooked chicken      c. Cereal

## 2018 Intermediate Team Breeding Activity

Team Name: \_\_\_\_\_

Team Members: \_\_\_\_\_

---

You are the owner operator of a highly regarded Purebred Angus and Sim-Angus cow herd in Kentucky. Customers from across the United States visit your farm looking for high quality cattle to use in their commercial herds. Most of your bulls go to operations that run an Angus cow base or some type of an F-1 cross of angus/Hereford. You have recently partnered with a high end restaurant to provide them with steaks that will grade choice or better. This allows you another avenue of helping your bull customers merchandise their calves at a premium. Answer the questions that follow and explain to the listener, which two heifers you would choose as replacements in your cow herd, and which bull do you feel would best fit the needs of your partner in the restaurant business and why. **(Each Heifer will have a point value, with the two the committee select adding up for a total of 50 points. There are ten questions over the data worth 10 points each for a total of 100 pts. Your presentation to the listener is worth 50 points. Total for Breeding Activity 200 pts.) Turn Paper Over to Finish this Activity.**
